

Trefethen

CELEBRATING THREE GENERATIONS

of Environmental Leadership in the Wine Industry

GREEN PRACTICES WE HAVE IMPLEMENTED:

- 100% Solar Power and Electric Automobiles
- Recapture, purification, and liquefaction of CO₂ gases emitted during the wine fermentation process for reuse in industrial applications
- Reusing greywater for irrigation
- Cover crops planted to enhance soil health, absorb excess water, and provide habitat for beneficial insects
- Natural pest control with owls, bats, bluebirds, and hawks
- Food and vegetation waste is turned into compost
- Night harvesting to keep grapes naturally cool and grape sugars stable
- Restoration of riparian areas
- Year-round jobs and full benefits, and 401K for all employees, including our farming team
- Certified Napa Green Land and Winery
- Certified California Sustainable Vineyard and Winery
- Certified Fish Friendly Farming
- Winner of the Botanical Research Institute of Texas (BRIT®) International Award of Excellence in Sustainable Winegrowing (2012)

Plant to planet
