

LEADING THE CHARGE

Environmental Leadership in the Wine Industry

Trefethen

FAMILY VINEYARDS

- Vineyard biodiversity starts with 10 varieties, 48 clones, 11 rootstocks, and numerous vine spacing and trellis systems
- Integrated pest management that encourages biodiverse predators including beneficial wasps, owls, bats, bluebirds, and hawks
- Restoration of riparian areas
- 100% solar powered, preventing emission of 500 tons of greenhouse gases annually
- Complementary electric car charging to encourage use of clean energy
- Recycling over 1.5MM gallons of stormwater and winery water for vineyard irrigation
- Early adopters of electric tractors
- Groundbreaking Carbon Capture pilot program to capture and purify CO2 from active fermentations
- Night harvesting to keep people and grapes cool as well as sugars stable
- 100% Herbicide free
- Permanent cover crops to enhance soil health, absorb excess water and atmospheric carbon, and provide habitat for beneficial insects
- 100% of farming completed by Trefethen's full time 60-person team
- Year-round jobs and full benefits, and 401K for all 140 employees
